Release Notes

Build: 18.08.02

Colleague Software Ltd

Date Created: 06/09/18

Colleague 7 Release Notes - 18.08.02

1. Introduction

This document communicates the new features and changes in this release of Colleague 7.

2. About This Release

Sprint Goal: Undertake the third phase of works in relation to the Summary View and continue with a series of updates to help improve performance.

3. New Features

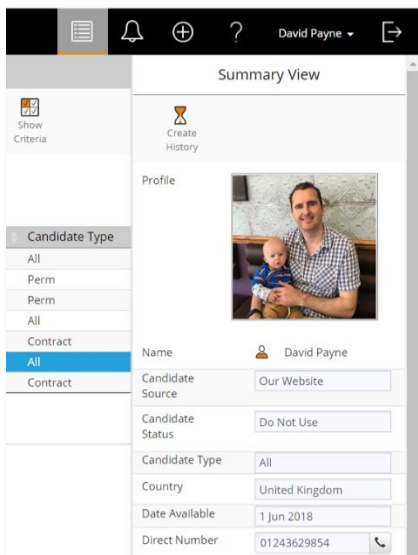

3.1 Implement Summary View - Create History

State: Done

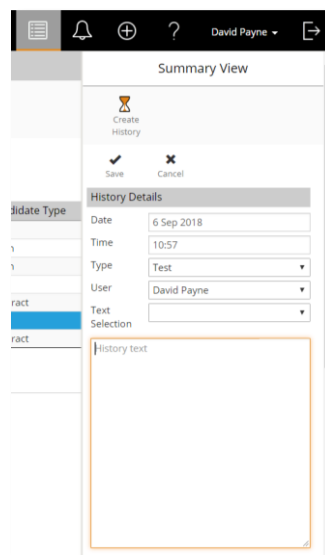

Type: Enhancement

User Notes:

It is now possible to Create History on a record from the Summary View panel in Search.

Create History Icon

When Clicking Create History

3.2 Access To Team Overview Based On User Privilege

State: Done

Type: Enhancement

User Notes:

A new User Group Permission has been created called 'View the Team Overview' which allows or denies access to the Team Overview report on the Colleague homepage.

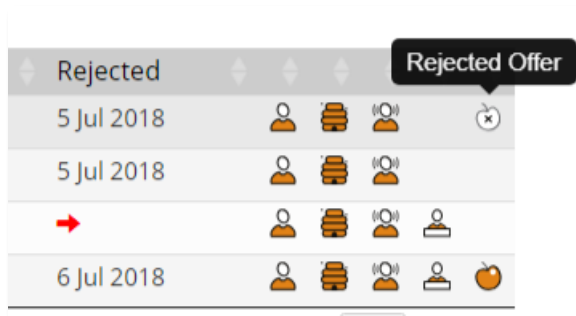

3.3 Rejected Offer Icon

State: Done

Type: Enhancement

User Notes:

To allow users to distinguish between pending and rejected offers within the Requirement Candidates screen, there is now a new icon for rejected offers.

3.4 Add Global Setting - To disable option of Colleague skills

State: Done

Type: Enhancement

User Notes:

Previously, when parsing a candidate's CV, any skills which are found will be 'ticked' by default in the Register Candidate screen. A new global (and personal) setting has been introduced to allow users to decide whether they would like these skills ticked or not by default.

Colleague Skills

IT Skills C#.NET

IT Skills AJAX

IT Skills Python

IT Skills SQL Server 2008

Analytics Coremetric

Analytics Webtrends

The new global / personal setting can be found under the 'Integrations' section, and is called 'When parsing, add skills to the new record by default?'

3.5 Add Company Name to Contact Selection Screen

State: Done

Type: Enhancement

User Notes:

Company is now available as a searchable field on the Contact Selection screen.

Company	<input type="text"/>	Q X
Surname	<input type="text"/>	
Forenames	<input type="text"/>	
Email	<input type="text"/>	

4. Bug Fixes

4.1 Performance Issue - Multiple Entity Lookups Master Reads

State: Done

Type: Bug

User Notes:

Header rows for custom fields are now held within the Redis Cache to reduce the number of database calls and the optimise the response time when retrieving this data.

4.2 PDF Documents Downloading Automatically When Accessing Record

State: Done

Type: Bug

User Notes:

Issue down to incorrectly assigning content type format of PDF files (which are predominantly image based). Being set as of 'application/octet-stream' when it should be 'application/pdf'.

Fixed to now ensure the correct content type when extension is '.pdf'. Update will include retrospectively updating existing records.
