Colleague Software Ltd

Date Created: 15/11/17

Colleague 7 Release Notes - 17.11.01

1. Introduction

This document communicates the new features and changes in this release of Colleague 7.

2. About This Release

Sprint Goal: Continue to enhance and refine the Search based on client feedback and to complete phase two of the 'Right To Consent' GDPR work.

3. New Features

3.1 PBI 20922 - Found Column Missing From Search Results Options For When Combining Results

State: Done

Type: Enhancement

User Notes:

A new 'Found' column is now available in the search results screen, which allows users to quickly see which results were added to an existing search.

When carrying out a new search, the 'Found' column will contain an exclamation mark image for all search results.

If the search criteria is updated, on loading the results again, any pre-existing results for that search which also were contained in the new search result will display a green tick in the Found column. Records from the previous search will show an exclamation mark in the 'Found' column, and any new results will show a blank field in the 'Found' column.

Show entries

<input type="checkbox"/>	Found	 Candidate Id	 Forenames
<input type="checkbox"/>	!	244	David
<input type="checkbox"/>	!	8814	Dot Net
<input type="checkbox"/>	!	212	Michael
<input type="checkbox"/>	This record was part of the original search		James
<input type="checkbox"/>	!	276	Patrick
<input type="checkbox"/>	!	155	Anthony

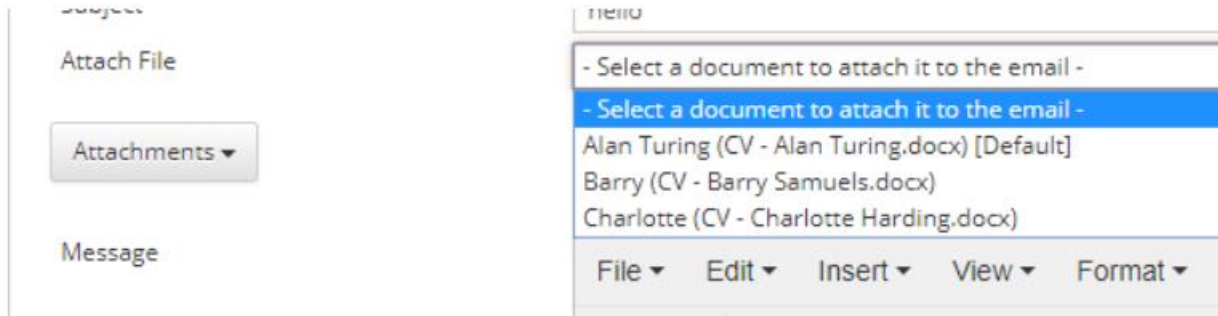

Showing 1 to 6 of 6 entries

3.2 PBI 30401 - Show 'Default' Document Within List Of Attachments/Inline CV Link

State: Done

Type: Enhancement

User Notes: When viewing a list of documents (e.g. adding an attachment when sending an email), the default document is now 'highlighted' by the item in the drop down list having "[Default]" appended to it.

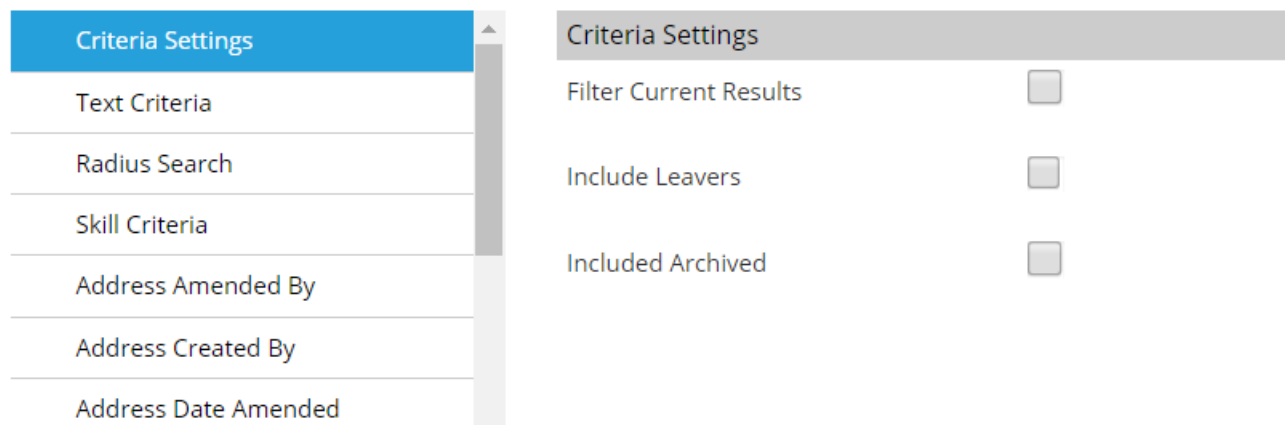

3.3 PBI 25278 - Include Leavers Option In Contact Search

State: Done

Type: Enhancement

User Notes: Users now has the option include leavers within a contact search. The default for contact searches is that leavers are excluded unless the option to include them is selected. A change has also been made in company-contacts to ensure including/excluding leavers are listed correctly.

3.4 PBI 30233 - Web Service Works To Support GDPR Legislation (Phase 2).

State: Done

Type: Enhancement

User Notes: This enhancement facilitated the creation of an API method to support the GDPR consent URL, which passes back data to the record in the event of the recipient clicking – ‘Yes’ or ‘No’.
Full solution to be finalised in phase 3 and released.

3.5 PBI 24269 - Establish new location for WebConfig settings

State: Done

Type: Enhancement

User Notes: Updates were made to minimise any potential disruption to users during maintenance works.

3.6 PBI 31134 - Clear Cache Key Issue

State: Done

Type: Bug

User Notes: Update was applied to allow manual refreshing of cached data

4. Bug Fixes

4.1 PBI 9916 - Candidate Married Fields search criteria is a To/From field

State: Done

Type: Bug

User Notes: For fields which are "Yes/No" fields, the Search will now show "Yes" and "No" checkboxes for these fields (instead of "From" and "To" numeric/text fields)

4.2 PBI 12241 - Document Importer - if it cannot find a document mark it as missing

State: Done

Type: Enhancement

User Notes: Updates to improve the upgrade process when moving documents from Colleague 6 to Colleague 7 environment.
